Shenzhen Feasycom Technology Co., Ltd.

Chapter 1

Introduction

1.1 Overview

Welcome to use the Feasycom BT3431 series Bluetooth module. This document mainly introduces the OTA upgrading process of the BT3431 series Bluetooth module.

1.2 Applicability

This document is applicable to the Feasycom BT3431 series module.

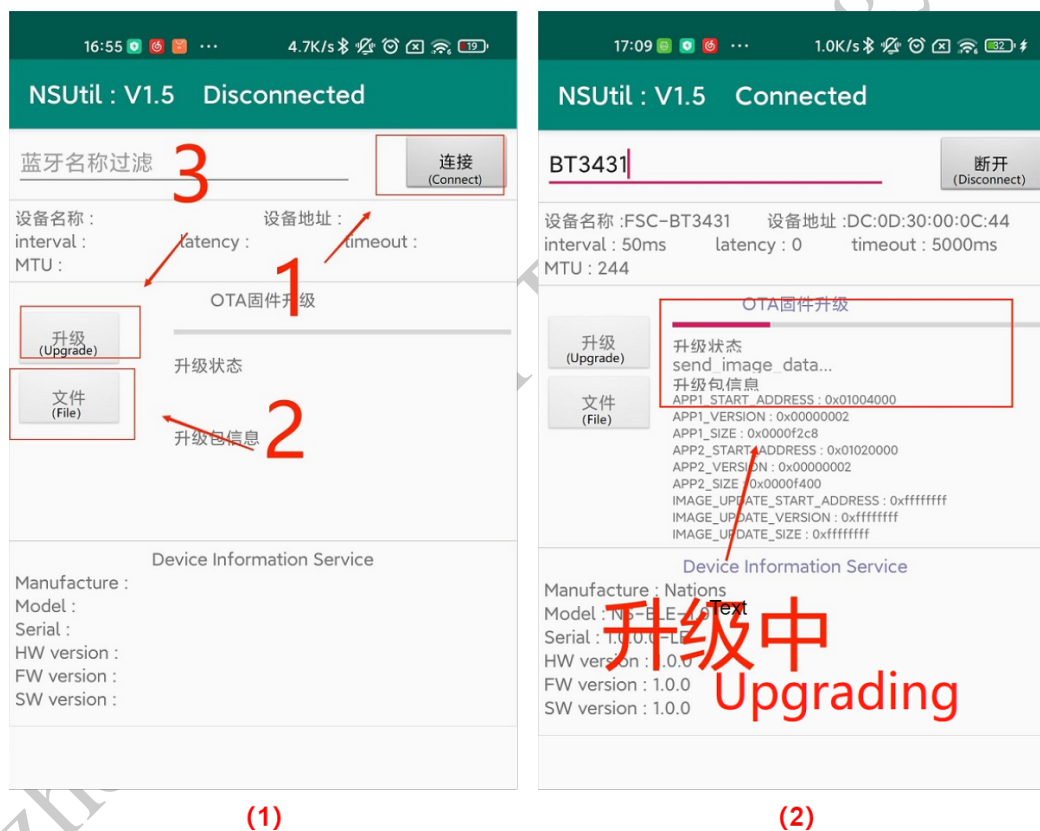

Chapter 2

Preparation work

1. Android phones. OTA upgrading is currently only supported for Android phones.
2. Upgrade APP **NSUtil** (APP download link: [\[Feasycom Appgallery\]](#)).
3. Upgrade file. Files with the **_Update** extension are upgrade files.
4. Transfer the upgrade file to the phone.

Chapter 3

Upgrading Steps

1. Open the **NSKUtil** APP
2. Select Bluetooth device and connect
3. Select the local upgrade file
4. Click “Upgrade” to update Bluetooth
5. After the upgrade is successful, the app will automatically disconnect.

Chapter 4

Read Firmware Version

You can query the module version through the AT+VER command.

```
>>AT+VER  
  
<<  
+VER=1.1.6,FSC-BT3431  
  
OK
```
